

Service Manual

●RS-D2/UC

OPTICAL DIGITAL REFERENCE SYSTEM
SYSTEM CONTROL TUNER/CD

RS-D2

UC,EW,ES

The chapter 1 of this Service Manual will not be reprinted. On your additional orders, we may supply only the chapter 2. For the chapter 1, please make copies and attach to the chapter 2 at your side if necessary.

NOTE:

- See the service manual DEH-M980/UC (CRT1450) for the CD mechanism description, disassembly and circuit description.
- This device employs an inverter as the power supply for EL. The inverter has an output voltage reach approximately 200 volts(AC). Utmost care should be used not to suffer from a possible electric shock, accordingly.

CHAPTER 1

●CD Player Service Precautions

1. For pickup unit (CGY1020) handling, please refer to "Disassembly"(Fig.1). During replacement, handling precautions shall be taken to prevent an electrostatic discharge(Protection by a short pin).
2. During disassembly, be sure to turn the power off since an internal IC might be destroyed when a connector is plugged or unplugged.

Fig.1

SAFETY INFORMATION

(UC MODEL)

CAUTION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely; you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

(EW MODEL)

1. **Safety Precautions for those who Service this Unit.**
 - Follow the adjustment steps (see pages 1-13 through 1-24) in the service manual when servicing this unit. When checking or adjusting the emitting power of the laser diode exercise caution in order to get safe, reliable results.

Caution:

1. During repair or tests, minimum distance of 13cm from the focus lens must be kept.
2. During repair or tests, do not view laser beam for 10 seconds or longer.

2. A "CLASS 1 LASER PRODUCT" label is affixed to the rear of the player.

3. The triangular label is attached to the mechanism unit frame.

Digital input Optical input

CD player

System Compact disc audio system

Usable discs Compact disc

Signal format

(Sampling frequency) 44.1 kHz

(Number of quantization bits) 16 bit linear

Number of channels 2 (stereo)

FM tuner

Frequency range(UC,ES) 87.9 – 107.9 MHz

Frequency range(EW,ES) 87.5 – 108 MHz

Usable sensitivity 8 dBf (0.7 μ V/75 Ω , mono)

50 dB quieting sensitivity 13 dBf (1.2 μ V/75 Ω , mono)

Signal-to-noise ratio 70 dB (IEC-A network)

Distortion 0.3% (at 65 dBf, 1 kHz, stereo)

Frequency response 30 – 15,000 Hz (\pm 3 dB)

Stereo separation 40 dB (at 65 dBf, 1 kHz)

MW tuner

Frequency range(UC,ES) 530 – 1,710 kHz

Frequency range(EW,ES) 531 – 1,602 kHz

Usable sensitivity 18 μ V (25 dB) (S/N: 20 dB)

Selectivity 50 dB (\pm 9 kHz)

LW tuner(EW)

Frequency range 153 – 281 kHz

Usable sensitivity 30 μ V (30 dB) (S/N: 20 dB)

Selectivity 50 dB (\pm 9 kHz)

AUX (external input)

Frequency response 10 – 20,000 Hz (+0, -1 dB)

Distortion 0.005% (at 1 kHz, 1 V, 20 kHz, L.P.F.)

Signal-to-noise ratio 90 dB (at 1 kHz, 1 V, 20 kHz, L.P.F.)

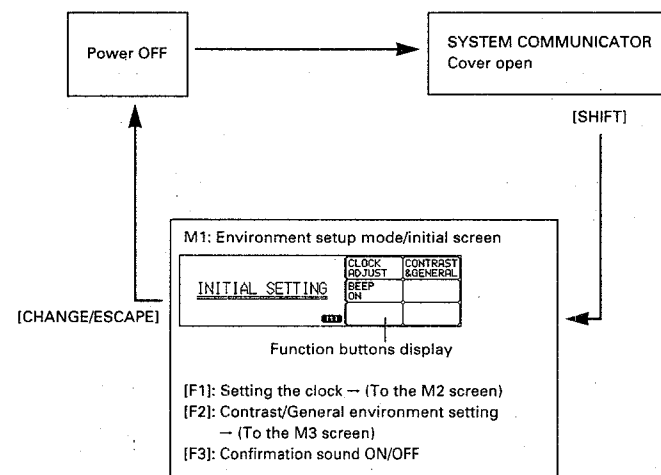

Separation 85 dB (at 1 kHz, 1 V, 20 kHz, L.P.F.)

ODR System — Reference Manual —

- > This Reference Manual gives a simple explanation of the functions of the ODR System (mainly audio adjustment functions) by using charts of the display.
- > The Reference Manual explains the operations using the SYSTEM COMMUNICATOR.
- > The buttons inside the cover cannot be used, even if the cover is open, when the SYSTEM COMMUNICATOR is being used as a wireless remote control unit. To use these buttons, install the SYSTEM COMMUNICATOR to the base and use it as a wired system.
- > The names of the buttons to be used in operations are indicated inside parentheses []. (For example, Function button/3 is referred to as [F3].) For details on the names of buttons, please see "How to use this manual" (page iv) of the Owner's Manual.
- > Refer to the Owner's Manual for more details of the functions outlined in this manual.

Environment setup mode

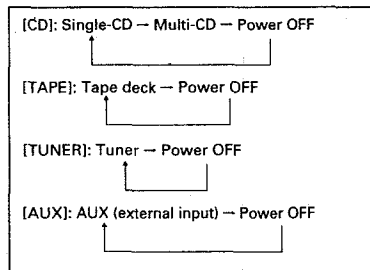

- > Use this mode to set the environment under which the ODR System is to be used.

- > [◀▶], [+/-] and [F] buttons to specify respective environment settings.
- > Operating the main unit allows the system to be changed to the environment setup mode even while the power is ON. (Hold down the SOURCE button of the main unit for at least 2 seconds after opening the cover of the SYSTEM COMMUNICATOR.)

3. DISASSEMBLY

●Removing the Case

- 1.Remove the two screws A, and then remove the two holders.
- 2.Remove the three screws B, and then remove the case.

Fig.2

- 3.Remove the four screws.(Fig.4)
- 4.Disconnect the connector of CD mechanism module, and then remove the CD mechanism module.(Fig.4)
- 5.Disconnect the four connectors.(Fig.4)
- 6.Remove the grille panel assy.(Fig.4)

Fig.4

●Removing the CD Mechanism Module and the Grille Panel Assy

- 1.Remove the two screws.(Fig.3)
- 2.Disconnect the two stoppers indicated by arrows.(Fig.3)

Fig.3

●Removing the Chassis Unit

- 1.Remove the screw C, screw J two screws E and screw D.
- 2.Unbend the tabs at four locations indicated by arrows.
- 3.Disconnect the stopper indicated by arrow, and then remove the holder.
- 4.Remove the screw F.
- 5.Remove the chassis unit.

Fig.5

●Removing the Detach Grille Assy

- 1.While holding the tab of gear unit at locations indicated by black arrow.(Fig.6)
- 2.Press the detach grille Assy at locations indicated by white arrows.(Fig.6)
- 3.While holding down the lock button, pull the detach grille assy toward you.(Fig.7)

Fig.6

Fig.7

●Removing the Cover Unit

- 1.Remove the four screws.
- 2.Disconnect the four stoppers indicated by arrows.
- 3.Remove the cover unit.

Fig.8

●Removing the Control P.C.Board

- 1.Disconnect the two connectors.
- 2.Remove the four screws.
- 3.Remove the solder, and then remove the control P.C.board.

Fig.9

●Removing the Driver P.C.Board

- 1.Remove the three screws.
- 2.Remove the driver P.C.board.

Fig.10

●Removing the EL

- 1.Remove the solder.
- 2.Unbend the tabs at six locations indicated by arrows.
- 3.Remove the holder.
- 4.Remove the EL.

Fig.11

●Removing the Holder Unit

- 1.Remove the three washers.
- 2.Remove the screw, and then remove the holder unit.

Fig.12

●Removing the Lower Case

- 1.Remove the battery cover, and then remove the battery.
- 2.Remove the door unit.
- 3.Remove the two screws G and four screws H.
- 4.Disconnect the four stoppers indicated by arrows.
- 5.Remove the lower case.

Fig.13

●Removing the Switch P.C.Board(A) and Main P.C.Board

- 1.Remove the four screws.
- 2.Disconnect the two connectors.
- 3.Remove the switch P.C.board(A) and main P.C.board.

Fig.14

4. ADJUSTMENT

4.1 CD PLAYER SECTION

1)Precautions

- This unit uses a single power supply (+5V) for the regulator. The signal reference potential, therefore, is connected to REFOUT (approx. 2.5V) instead of GND. If REFOUT and GND are connected to each other by mistake during adjustments, not only will it be impossible to measure the potential correctly, but the servo will malfunction and a severe shock will be applied to the pick-up. To avoid this, take special note of the following.

Do not connect the negative probe of the measuring equipment to REFOUT and GND together. It is especially important not to connect the channel 1 negative probe of the oscilloscope to REFOUT with the channel 2 negative probe connected to GND.

And since the frame of the measuring instrument is usually at the same potential as the negative probe, change the frame of the measuring instrument to floating status.

If by accident REFOUT comes in contact with GND, immediately switch the regulator or power OFF.

- Always make sure the regulator is OFF when connecting and disconnecting the various filters and wiring required for measurements.
- Before proceeding to further adjustments and measurements after switching regulator ON, let the player run for about one minute to allow the circuits to stabilize.
- Since the protective systems in the unit's software are rendered inoperative in test mode, be very careful to avoid mechanical and /or electrical shocks to the system when making adjustment.
- Test mode starting procedure
Switch ACC, back-up ON while pressing the OPEN/DETACH and SOURCE keys together.
- Test mode cancellation
Switch ACC, back-up OFF.

- Disc detection during loading and eject operations is performed by means of a photo transistor in this unit. Consequently, if the inside of the unit is exposed to a strong light source when the outer casing is removed for repairs or adjustment, the following malfunctions may occur.

*During PLAY, even if the eject button is pressed, the disc will not be ejected and the unit will remain in the PLAY mode.

*The unit will not load a disc.

When the unit malfunctions this way, either re-position the light source, move the unit or cover the photo transistor.

- When loading and unloading discs during adjustment procedures, always wait for the disc to be properly clamped or ejected before pressing the another key. Otherwise, there is risk of the actuator being destroyed.
- Turn power off when pressing the button TRACK UP or the button TRACK DOWN key for focus search in the test mode. (Or else lens may stick and the actuator may be damaged.)

Key of Free Space Assy	Function
CHANGE/ESCAPE	Regulator ON/OFF
TRACK UP	FWD kick
TRACK DOWN	REV kick
F·3	Tracking close
F·2	Tracking open
F·6	Focus close
F·4	Focus open
F·5	Jump-Off
F·1	1/10/32 jump/carriage move switching

- SINGLE/10TRK/32TRK will continue to operate even after the key is released. Tracking closed the moment C-MOVE is released.
- JUMP MODE resets to SINGLE as soon as power off.

●Measuring Equipment and Jigs

Adjustment	Measuring equipment & jigs
1 Grating Adjustment (Rough adjustment)	Oscilloscope, clock driver, grating adjustment filter (bandpass filter)(GGF-133), AC millivoltmeter TCD-782 (or SONY TYPE4) Extension Cable:GGF1132,GGF1135
2 Tangential Skew Check (Fine adjustment)	Oscilloscope, screwdriver TCD-782 (or SONY TYPE 4) Extension Cable:GGF1132,GGF1135
3 Grating Adjustment	Oscilloscope, clock driver, two low-pass filters TCD-782 (or SONY TYPE 4) Extension Cable:GGF1132,GGF1135
4 FE Bias Adjustment	Oscilloscope TCD-782 (or SONY TYPE 4) Extension Cable:GGF1132,GGF1135
5 RF Offset Adjustment	Oscilloscope TCD-782 (or SONY TYPE 4) Extension Cable:GGF1132,GGF1135

9 Tracking Servo Loop Gain Adjustment	Oscillator, gain adjustment filter (GGF-065), dual meter milli-voltmeter TCD-782 (or SONY TYPE 4) Extension Cable:GGF1132,GGF1135
10 TE Offset Adjustment-2	DC voltmeter Extension Cable:GGF1132,GGF1135
11 Tracking Balance Adjustment-2	Oscilloscope TCD-782 (or SONY TYPE 4) Extension Cable:GGF1132,GGF1135

● Adjustment Point

Fig.15

● Test Point

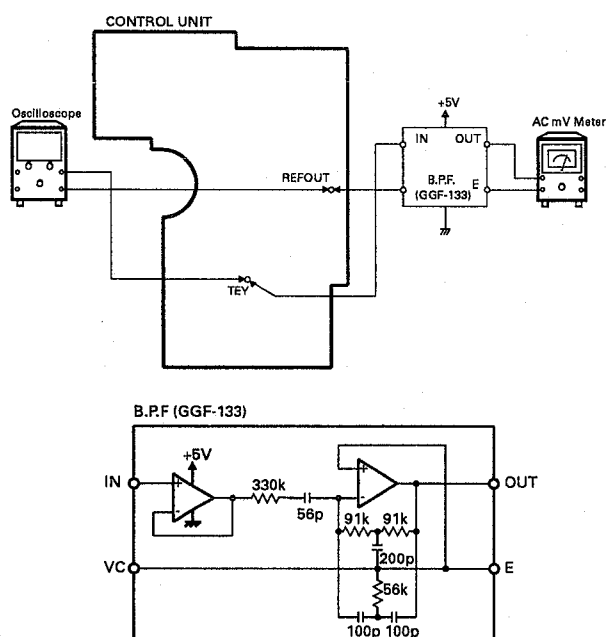

Fig.16

1 Grating Adjustment (Rough adjustment)

- **Purpose:**
The grating may need adjustment in a replaced pick-up unit.
- **Maladjustment symptoms:**
No disc playback ; track jumping.
- **Measuring equipment / jigs** · Oscilloscope, clock driver, grating adjustment filter (band-pass filter)(GGF-133), AC millivoltmeter.
- **Measuring point** · TEY
- **Test disc and setting** · TCD-782 (or SONY TYPE 4)
· Test mode.
- **Adjustment position** · Pick-up grating adjustment hole.

Adjustment Procedure

1. Switch regulator ON in test mode, and load a disc.
2. Use **TRACK UP** or **TRACK DOWN** key as required to bring pick-up at the adjusting hole on control unit (Tune TNO 19). (TYPE 4: TNO 14)
Match with TNO 19 (TYPE 4: TNO 14) when releasing the control unit.
3. Press the **F·6** key to close focus.
4. While monitoring the TEY filter output by AC millivoltmeter, turn the grating adjustment hole slowly. The AC voltage increases and decreases while turning the screw. Search for the minimum voltage level. (This corresponds to the position where the grating is on a track, and is referred to as the null point.)
5. Then while monitoring TEY by oscilloscope, turn the driver slowly clockwise from the null point (as seen from under the pick-up) until the first wave form peak amplitude is reached.

2 Tangential Skew Check

- **Purpose:**
To check whether tangential skew has been misaligned or not when replacing the pick-up unit.
- **Maladjustment symptoms:**
No disc playback ; track jumping.
- **Measuring equipment / jigs** · Oscilloscope, screwdriver
- **Measuring point** · RFO
- **Test disc and setting** · TCD-782 (or SONY TYPE 4)
· Normal mode
- **Adjustment position** · Pick-up tangential adjustment screw

Adjustment Procedure

1. Check that the pick-up position does not differ from that at the same time of grating adjustment. (TCD-782: TNO 19, TYPE 4: TNO 14)
2. Turn the tangential adjustment screw to obtain a good RF waveform eye pattern. Turn the adjustment screw both clockwise and counterclockwise to points where the eye pattern deteriorates, and take the midway point as the adjustment point. As a general guide, look for an overall clear waveform, and one of the diamond shapes in the eye pattern. The diamond shapes should appear in fine lines at the point of optimum adjustment. Take care not to knock the pick-up with the screwdriver at this stage. (This kind of accident can result in loss of focus.) (See Waveform 1,2)
3. Apply "screw-lock" to the tangential adjustment screw.
4. After adjusting tangential skew, also adjust the grating.

AC Mode
0.5V/div.
0.1μs/div.

Waveform 2

3 Grating Adjustment(Fine adjustment)

• Purpose:

The grating may need adjustment in a replaced pick-up unit.

• Maladjustment symptoms:

No disc playback; track jumping.

• Measuring equipment / jigs

• Oscilloscope, clock driver, two low-pass filters

• Measuring point

• ELPF output, FLPF output

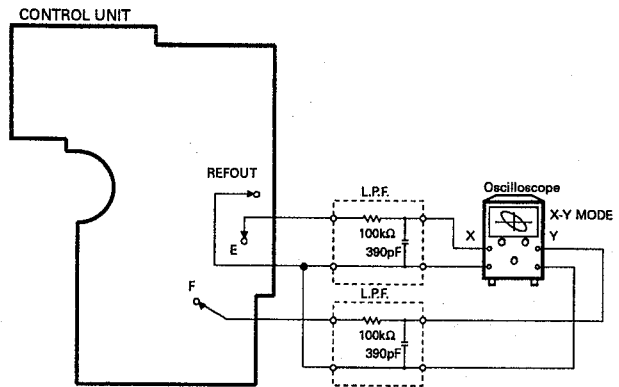

• Test disc and setting

• TCD-782 (or SONY TYPE 4)

• Test mode

• Adjustment position

• Pick-up grating adjustment hole

Adjustment Procedure

1. Switch regulator ON in test mode, and load a disc.

2. Use **TRACK UP** or **TRACK DOWN** key as required to bring pick-up at the adjusting hole on control unit (Tune TNO 19). (TYPE 4: TNO 14)

Match with TNO 19 (TYPE 4: TNO 14) when releasing the control unit.

3. Press the **F·6** key to close focus.

4. With the E low-pass filter output connected to the X axis of the oscilloscope, and the F low-pass filter output connected to the Y axis, apply an input in AC mode and observe the Lissajous figure. (See Waveform 3-8)

5. Using the driver, adjust the Lissajous figure to a single line (or as close as possible).

6. Switch regulator OFF and remove the filters.

TEY waveform 5ms/div, 0.5V/div.

Waveform 3

Null Point

Waveform 7

Waveform 8

4 FE Bias Adjustment

• Purpose:

To adjust the focus servo bias to an optimum value.

• Maladjustment symptoms:

Focus closing difficulty, poor playability.

• Measuring equipment / jigs

• Oscilloscope

• Measuring point

• RFO

• Test disc and setting

• TCD-782 (or SONY TYPE 4)

• Normal mode

• Adjustment position

• VR355(FEB)

OK

Waveform 9

AC Mode

Before adjustment

Waveform 10

Adjustment Procedure

1. Play in normal mode.

2. Observe RFO in respect to REFOUT in the oscilloscope, and adjust VR355(FEB) to obtain maximum RF and eye pattern. (See Waveform 9, 10)

5 RF Offset Adjustment

- **Purpose:**
To adjust the RF amplifier offset to a suitable value.
- **Maladjustment symptoms:**
Focus closure fails readily.

- **Measuring equipment / jigs** · Oscilloscope
- **Measuring point** · RFO
- **Test disc and setting** · TCD-782 (or SONY TYPE 4)
· Normal mode
- **Adjustment position** · VR352(RFO)

Adjustment Procedure

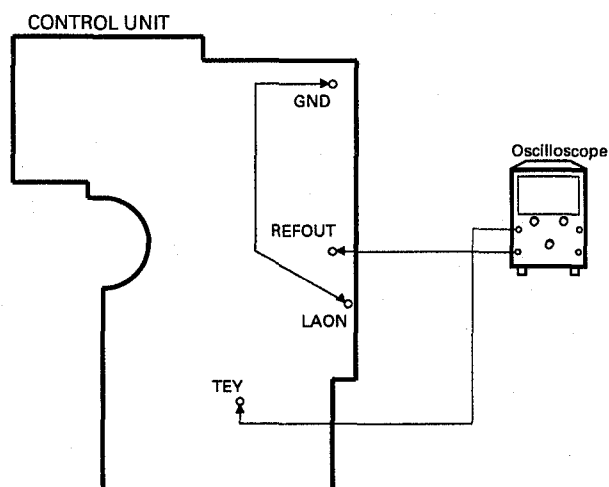

1. Play tune TNO 19 in normal mode. (TYPE 4: TNO 14)
2. Use VR352 to adjust the RFO waveform so that REFOUT appears at the center. (A-B must not exceed 100 mV.)

6 TE Offset Adjustment-1

- **Purpose:**
To adjust the electrical offset of the tracking servo to zero
- **Maladjustment symptoms:**
Search times too long, carriage run-away.

- **Measuring equipment / jigs** · DC voltmeter
- **Measuring point** · TEY
- **Test disc and setting** · No Disc
· Test mode
- **Adjustment position** · VR353(TEO)

Adjustment Procedure

1. Connect LAON to GND.
2. Switch regulator ON while in test mode.
3. Using VR353(TEO), adjust the TEY output DC voltage in reference to REFOUT to a value of $0 \pm 25 \text{ mV}$.
4. Switch regulator OFF.

7 Tracking Balance Adjustment-1

• Purpose:

To adjust the tracking servo offset to zero.

• Maladjustment symptoms:

Search times too long, poor playability, carriage run-away.

• Measuring equipment / jigs

• Oscilloscope

• Measuring point

• TEY (Tracking error signal)

• Test disc and setting

• TCD-782 (or SONY TYPE 4)

• Test mode

• Adjustment position

• VR351 (T.BAL)

Adjustment Procedure

1. Set the test disc (TCD-782). Switch regulator ON.
2. Using the **TRACK UP** or **TRACK DOWN** key, move the pick-up to about the center of the signal surface.
3. Press the **F-6** key to close focus.
4. Using an oscilloscope, observe the TEY signal in respect to REFOUT.
Then adjust VR351 (T.BAL) to set the positive and negative amplitudes to the same levels.
(See Waveform 11-13)
5. Switch the power OFF.

+ 5% NG

8 Focus Servo Loop Gain Adjustment

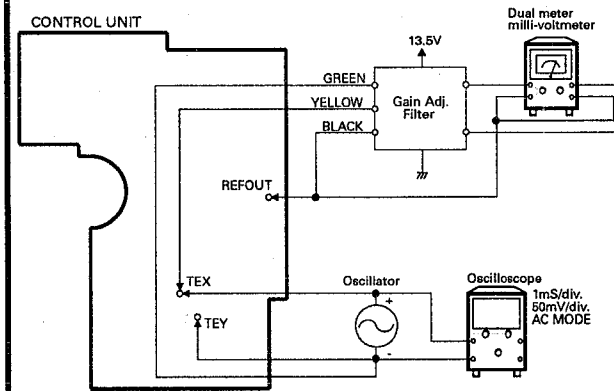

- **Purpose:**
To adjust the focus servo loop gain to an optimum value.
- **Maladjustment symptoms:**
Poor playability, reduced resistance to vibration, focus closure fails readily.
- **Measuring equipment / jigs** · Oscillator, gain adjustment filter (GGF-065), dual meter milli-voltmeter
- **Measuring point** · FEX, FEY
- **Test disc and setting** · TCD-782 (or SONY TYPE 4)
· Normal mode
- **Adjustment position** · VR356(FG)

**Adjustment Procedure**

1. After checking that the power is OFF, connect the gain adjustment filter and measuring equipment as shown in the above diagram.
2. Play tune TNO 19 in normal mode. (TYPE 4: TNO 14)
3. Set the oscillator to 1kHz, and observe the FEX/FEY output in the oscilloscope. Adjust the oscillator output to obtain a FEX/FEY output of 100mVp-p.
4. Adjust VR356(FG) to obtain a milli-voltmeter difference of 0 ± 0.5 dB.

9 Tracking Servo Loop Gain Adjustment

- **Purpose:**
To adjust the tracking servo loop gain to an optimum value.
- **Maladjustment symptoms:**
Poor playability, reduced resistance to vibration.
- **Measuring equipment / jigs** · Oscillator, gain adjustment filter (GGF-065), dual meter milli-voltmeter.
- **Measuring point** · TEX, TEY
- **Test disc and setting** · TCD-782 (or SONY TYPE 4)
· Normal mode
- **Adjustment position** · VR354(TG)

**Adjustment Procedure**

1. After checking that the power is OFF, connect the gain adjustment filter and measuring equipment as shown in the above diagram.
2. Play tune TNO 19 in normal mode. (TYPE 4: TNO 14)
3. Set the oscillator to 1.4kHz, and observe the TEX/TEY output in the oscilloscope. Adjust the oscillator output to obtain a TEX/TEY output of 300mVp-p.
4. Adjust VR354(TG) to obtain a milli-voltmeter difference of 0 ± 0.5 dB.

10 TE Offset Adjustment-2

- **Purpose:**
To adjust the electrical offset of the tracking servo to zero.
- **Maladjustment symptoms:**
Search times too long, carriage run-away.
- **Measuring equipment / jigs** · DC voltmeter
- **Measuring point** · TEY
- **Test disc and setting** · No Disc
· Test mode
- **Adjustment position** · VR353

Adjustment Procedure

Same as for TE offset adjustment-1, but with the DC voltage of the TEY output adjusted to 0 ± 50 mV. The purpose of this additional adjustment is to correct any deviations generated when carrying out the tracing balance and tracking servo loop gain adjustments after completing TE offset adjustment-1.

11 Tracking Balance Adjustment-2

- **Purpose:**
To adjust the tracking servo offset to zero.
- **Maladjustment symptoms:**
Search times too long, poor playability, carriage run-away.
- **Measuring equipment / jigs** · Oscilloscope.
- **Measuring point** · TEY
- **Test disc and setting** · TCD-782 (or SONY TYPE 4)
· Test mode
- **Adjustment position** · VR351

Adjustment Procedure

Steps 1 thru 5 same as tracking balance adjustment-1. 6. Check that the level difference between the positive and negative amplitudes of the TEY signal is within 5% (See Waveform 11-13). If greater than 5%, adjust with VR351. 7. If further adjustment was necessary in step 6, repeat TE offset adjustment-2.

4.2 AUDIO/TUNER SECTION

No.	FM SSG		Displayed Frequency(MHz)	Adjustment Point	Adjustment Method (Switch Position)
	Frequency(MHz)	Level(dBf)			
1	106.1 M2	52	106.1	VR501	DC V Meter(4) : 2.3V±0.05V

SYSTEM CLOCK ADJUSTMENT

No.	Adjustment Point	Adjustment Method (Switch Position)
1	TC601	Frequency Counter : 1.048576MHz±2Hz (S1 : ON)

LCD CONTRAST ADJUSTMENT

No.	Adjustment Point	Adjustment Method (Switch Position)
1	VR901	Best contrast

NOTE:

LCD contrast adjustment can made by controlling the voltage with the DC V meter (3) .However, as the voltage varies with temperature, rough adjustment should be made with referring to typical voltages shown in the table below, and finally the contrast should be adjusted to optimum by visual sense.

Contrast Adjustment Voltage (Example)

Temperature(°C)	DC V Meter(3)
0	-11.79V
10	-11.49V
25	-11.36V

5. ERROR NUMBERS AND NEW TEST MODE

●Indicating An Error Number

If the CD should fail to operate in CD multi player or if an error has taken place during the operation and resulted in an error, the player will enter into the error mode. And the cause of such error is numerically indicated.

This is aimed at assisting an analysis or repair.

(1) Basic Means of Display

· With ERROR indicated in "MODE" on IP-BUS Display date, an error code is transmitted by the use of MIN and SEC. Identical date are transmitted with MIN and SEC.

· Examples of Head Unit Display ERROR XX

(2) Number of Error Codes

100 codes, ranging from 00 through 99.

(3) Error Codes

Error Code	Classification	Description	Cause/Detail
10	ELECTRIC	Carriage home failure	Unmovable to and from the inner circumference → Home switch failed and/or carriage improperly moved
11	ELECTRIC	Focus failure	Focus failed → Disk scarred or stained on the back or vibrating hard
12	ELECTRIC	SETUP failure	Spindle failed to lock or subcode extraordinary → Spindle defective, disk other than audio and ROM
14	ELECTRIC	Blank Disk	Unrecorded CD-R The disc has been inserted upside down
30	ELECTRIC	Search time out	Target address failed to reach → Carriage/tracking improperly and/or disk scarred
A0	SYSTEM/ MECHANISM	Power failure	Power overvoltage or short circuit detected → Switching transistor defective and/or power abnormal
50	MECHANISM	An error upon ejection	MAG SW release time has time out Elevation time out when eject
60	MECHANISM	An error while putting in and out the tray	Tray in/out time has time out Tray is caught when put in
70	MECHANISM	An error upon elevation	Elevation time has time out
80	MECHANISM	An error with an empty magazine inserted	No disk is available

●New Test Mode(aging operation and setup analysis)

The CD multi player plays in normal mode. After being set up, it will display FOK (focus), LOCK (spindle), subcode, sound skip, protection against a mechanical error or the like, occurrence of an error, cause and time of an expiry, if any, (and disk number) during the setup, the CD software operation status (internal RAM and C-point) is displayed.

(1) How to Put in the NEW TEST Mode

See the test mode flow chart Page 1-14.

(2) Relations of keys between TEST and NEW TEST Modes

IP-BUS Commands	Keys	Test Mode		New Test Mode	
		Regulator OFF	Regulator ON	PLAY in progress	Error, Protection
15 00	CHANGE/ESCAPE	Regulator ON	Regulator OFF	CHANGE/ESCAPE	Cause of error selected
15 01	TRACK UP	—	FWD-KICK	TRACK UP/FF	—
15 02	TRACK DOWN	—	REV-KICK	TRACK DOWN/REV	—
15 03	F·3	—	TRACKING CLOSE	—	—
15 04	F·2	—	TRACKING OPEN	REPEAT MODE	—
15 05	F·6	—	FOCUS CLOSE	—	—
15 06	F·4 —	—	FOCUS OPEN	RANDOM	—
15 07	F·5 —	—	JUMP OFF	—	—
15 08	F·1	To New Test Mode	Jump-Mode Selected	AUTO/MANU	—

Operations, such as EJECT, CD ON/OFF, etc. are to be performed normally

(3) Error Cause (Error Number) Code

Error Code	Classification	Mode	Description	Cause/Detail
40	ELECTRIC	PLAY	FOK=L 100ms	Put out of focus
41	ELECTRIC	PLAY	LOCK=L 150ms	Spindle unlock
42	ELECTRIC	PLAY	Subcode unacceptable 500ms	Subcode fails to read
43	ELECTRIC	PLAY	Sound skipped	Last address memory operated

Scar,
Stain,
Vibration,
Servo defect,
etc...

*With CD single, no mechanical error is displayed while aging. The error code is identical with those in normal mode.

(4) Indicating an Operation Status During Setup

Status No.	Description	Protection operation
01	Carriage home mode started	None
02	Carriage moving on the internal circumference	10-second time out
03	Carriage moving on the external circumference	10-second time out
11	Setup started	None
12	Spindle turn/Focus search started	None
13	Waiting for focus closing	Failure to focus closing
14	Spindle kicked and focus checked	Out of focus
15	Tracking closed and focus checked	Out of focus
17	Carriage closed and focus checked	Out of focus
18	Lock waiting Subcode waiting	Failure to lock, subcode failed to read Out of focus
19	End	None

(5) Example of LCD Display.

(a) SET UP in progress

TRACK MIN SEC

11 11 11

While in the TEST MODE, a status number is indicated in TNO, MIN and SEC.

TRACK

11

MIN SEC

11 11

(b) Operation (PLAY, SEARCH, etc.) in progress perfectly identical with that in the multi mode.

(c) Protection/Error upon occurrence

ERROR-XX While in the error mode, an error number is displayed in MIN and SEC.

Select the display with the CHANGE/ESCAPE key.

TRACK MIN SEC

10 40 05

While in the PLAY MODE, an absolute time is indicated in TNO, MIN and SEC.

TRACK

10

MIN SEC

40 05

Select the display with the F·1 key.(When function is on.)

6. EXPLODED VIEW PARTS LIST

● Chassis(2)(Exploded View:Page 2-3)

NOTES:

- Parts marked by "*" are generally unavailable because they are not in our Master Spare Parts List.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

	92	Bracket Unit	CXA5078
	93	
	94	Screw	PMS26P040FMC
	95	Rack	CNV3268
	96	Spring	CBH1508
	97	Bracket	CNC4436
	98	Screw	JFZ17P035FNI
	99	Holder Unit	CXA5246
	100	PU Unit	CGY1020
	101	
	102	Spring	CBH1422
	103	Holder	CNC4306
	104	Screw	JGZ20P070FNI
	105	

Mark	No.	Description	Part No.
	106	Motor Unit>Loading)	CXA4267
*	107	Connector	CKS2063
	108	Connector	CKS2149
*	109	Connector	CKS2121
	110	Control Unit	CWX1678
	111	Weight	CNC5112
	112	Spring	CBH1458
	113	Spring	CBH1457
	114	Spacer	CNM3315
	115	CD Mechanism Unit	CXA5619
	116-118	
	119	Screw	CBA1230
	120	
	121	Screw	PMS20P025FMC

7. ELECTRICAL PARTS LIST

NOTES:

● Parts whose parts numbers are omitted are subject to being not supplied.

● The part numbers shown below indicate chip components.

Chip Resistor

RS1/○○S○○○J, RS1/○○S○○○J

Chip Capacitor (except for CQS.....)

CKS....., CCS....., CSZS.....

● Parts List(RS-D2/EW)

- The RS-D2/UC and RS-D2/ES Parts Lists enumerate the parts which differ from those enumerated in the RS-D2/EW Parts List only.

The parts other than those enumerated in the former are identical with those in the latter, to which you are requested to refer, accordingly. The RS-D2/EW Parts List is given on page 1-37.

●Pin Functions (PD4448A)

Pin No.	Pin Name	I/O	Output Format	Function and Operation
1-25	NC			Not used
26	VSS			GND
27	SW1	I		Wireless/Wired select input
28	KINH	O	C	Key input inhibit output
29	KDT	O	C	Key data wired output
30,31	NC			Not used
32-35	KD0-KD3	I		Key data input
36-42	KST0-6	O	N	Key strobe output
43,44	NC			Not used
45	REMOUT	O	C	Remote control output
46	VDD			Power supply
47	XIN	I		Crystal oscillating element connection pin
48	XOUT	O		Crystal oscillating element connection pin
49	RESET	I		Reset input
50	WDOUT	O	N	Watch dog timer output
51-57	NC			Not used
58	VSS			GND
59-64	NC			Not used

Output Format	Meaning
C	CMOS
N	N channel open drain

*PD4448A

IC's marked by * are MOS type.

Be careful in handling them because they are very liable to be damaged by electrostatic induction.

●Pin Functions (HD61202TF)

Pin No.	Pin Name	I/O	Function and Operation
1	VDD		Power supply
2-5	V4R-V1R		LCD drive level power supply
6	VEE		LCD drive circuit power supply
7-70	Y64-Y1	O	LCD segment output
71	VEE		LCD drive circuit power supply
72-75	V1L-V4L		LCD drive level power supply
76	GND		GND
77-84	D0-D7	I/O	Data BUS input/output
85	NC		Not used
86,87	CS3,CS2	I	Chip select input
88	NC		Not used
89	CS1	I	Chip select input
90	NC		Not used
91	LRST	I	Reset input
92	R/W	I	Read/write select input
93	D/I	I	Data/instruction select input
94	CL	I	Synchronizing signal input of display data latch
95,96	$\phi 2, \phi 1$	I	Clock input
97	E	I	Write / read enable input
98	FRM	I	Frame signal input
99	ADC	I	Display RAM Y address select input
100	M	I	LCD drive AC signal input

●Pin Functions (HD61203TF)

Pin No.	Pin Name	I/O	Function and Operation
1-19	X19-X1	O	LCD common drive output
20	VEE		LCD drive circuit power supply
21,22	V6L,V5L		LCD drive level power supply
23,24	V2L,V1L		LCD drive level power supply
25	VDD		Power supply
26	DL	I/O	Shift resistor data input/output
27	FS	I	Frequency select input
28,29	DS1,DS2	I	Display duty select input
30	C	I	Oscillator
31	NC		Not used
32	R		Oscillator
33	NC		Not used
34	CR		Oscillator
35	STB	I	Test input
36	SHL	I	Shift direction select input of shift resistor
37	GND		GND
38	NC		Not used
39	M/S	I	Master slave select input
40,41	$\phi 2, \phi 1$	O	Clock output
42	NC		Not used
43	FRM	O	Frame signal output
44	M	O	LCD drive AC signal output
45	NC		Not used
46	FCS	I	Shift clock phase select input
47	DR	I/O	Shift resistor data input/output
48	CL1	I	Test input
49	CL2	I/O	Shift clock input/output
50	TH	I	Test input
51,52	V1R,V2R		LCD drive level power supply
53,54	V5R,V6R		LCD drive level power supply
55	VEE		LCD drive circuit power supply
56-100	X64-X20	O	LCD common drive output

●Pin Functions (PD3254A)

Pin No.	Pin Name	I/O	Function and Operation
1	XTAL	I	Oscillation continuation terminal
2	EXTAL		
3	MD1	I	Not used
4	MD0	I	Cassette mechanism strobe input 0
5	NMI	I	Not used
6	VCC		
7	STBY	I	Not used
8	VSS		GND
9-13	KEYIN0-4	I	Key data input
14,15	NC		Not used
16	E	O	Enable clock output for LCD driver
17	SDTT	O	Serial data output for extension I/O IC
18	SDTR	I	Serial data input from extension I/O IC
19	SCK	I	Serial clock input/output for extension IC
20-22	NC		Not used
23	SBUSY	O	Busy output for extension I/O IC
24	LRES	O	Reset output for LCD driver
25	NC		Not used
26	IOS	O	Chip select output for LCD driver
27	AS	O	Not used
28	LCDR/W	O	Read / write output for LCD driver
29	PRRD	O	Read signal output for ROM IC
30	WAIT	I	Not used
31	VCC		
32-39	A15-A8	O	Address BUS output for ROM IC
40	VSS		GND
41-48	A7-A0	O	Address BUS output for ROM IC
49-56	D0-D7	I/O	Data input/output for ROM IC
57-60	CT1-CT4	O	LCD contrast control output
61	REMIN	I	Remote control signal input
62	BRST	O	Reset output extension I/O IC
63	NC		Not used
64	RES	I	Reset input

● Pin Functions (CWV1044)

Pin No.	Pin Name	I/O	Function and Operation
1	VDD		Power supply for RDS controller
2	GND		GND
3	RDSRDY	I	Ready input from system control IC
4	RDSEN	O	Enable output for system control IC
5	RDSCCK	I	Serial clock input from system control IC
6-9	RSDST7-4	I/O	Data input/output to system control IC
10	RDSSEL	I	Select input from system control IC
11	RDSRST	I	Reset input from system control IC
12	SCHK	I	Unit check input
13	TSEL	I	FM/AM tuner unit select input
14	GND		GND
15	COMP	I	FM composite signal input
16	FM5V		Power supply decoder
17	BPO	O	Band pass filter test output
18	SLCHK	O	SL check output
19	FLCHK	O	FL check output
20	SD	I	RDS decode control input
21	SL	I	Signal level input from tuner
22	SK	I	SK signal detect input
23	RLOCK	O	RDS test output
24	DK	O	DK signal detect output
25	ERROR	O	Disapprove of error correction output
26	CORR	O	Error output
27	RECEV	O	RDS synchronizing test output

●Pin Functions (PD4477A)

Pin No.	Pin Name	I/O	Output Format	Function and Operation
1	SBUSY	I/O	C	Reception enable input/output for extension I/O IC
2	RDSRST	O	C	Reset output for RDS IC
3	RDSSEL	O	C	Select output for RDS IC
4	AVSS			A/D GND
5	RDSEN	O	C	Enable output for RDS IC
6	RDSRDY	I		Ready input from RDS IC
7	AVREF	I		A/D converter reference voltage
8	SDI	I		Serial data input from extension I/O IC
9	SDO	O		Serial data output for extension I/O IC
10	SSCK	I/O	C	Serial clock input/output to extension I/O IC
11	RSDSI	I		Serial data input for RDS IC
12	RSDSO	O	C	Serial data output for RDS IC
13	RDSCK	I/O	C	Serial clock input/output for RDS IC
14	BRST	O	C	P-BUS reset output
15	BRXEN	I/O	C	P-BUS reception enable input/output
16	BSRQ	I		P-BUS serial pole request input
17	BSIO	I/O	C	P-BUS serial data input/output
18	BSCK	I/O	C	Communication serial clock input/output
19-26	AD0-AD7	I/O	C	Extension RAM data/address input/output
27-29	A8-A10	O	C	Extension RAM address output
28,29	XA0,XA1	O	C	Extension I/O select output
30	CS	O	C	External RAM chip select
31	LCDPW	O	C	LCD back light power supply control output
32	SWVDD	O	C	Free space Assy power supply control output
33	VSS			GND
34	SUBPW	O	C	Grille power control output
35	IPPW	O	C	Power supply control output for IP BUS interface IC
36	BSENS	I		Back up power sense input
37	ASENBO	O	N	Slave power supply control output
38	VDIN	I		Power supply short sensor input
39	LATCNT	O	N	Latch control output
40	RD	O	C	Extension IO / RAM read signal output
41	WR	O	C	Extension IO / write signal output
42	TESTIN	I		Test program mode input
43	ASTB	O	C	Timing output for extension RAM
44	TUNPW	O	C	Tuner power control output
45	PEE	O	C	Beep tone output
46	SCS	O	C	Chip select output for external RAM
47	SYSPW	O	C	System power supply control output
48	CDRST	O	C	Reset for CD mechanism module
49	PCL/ILLO	O	C	Clock adjustment output / Inside of frap illumination output
50	FM/AM	O	C	Not used
51	MONO	O	C	Forced mono output
52	DSNS	I		Grille detach sense
53	MSSLIN	I		Master/slave select input
54	MS/SL	O	C	Master/slave select output
55	ANTFIX	O	C	Tuner diversity fix select output
56	TX	O	C	IP BUS data output
57	RX	I		IP BUS data input
58	NC			Not used
59	SD	I		SD input
60	RESET	I		Reset input
61	REMIN	I		Remote control signal input
62	ASENS	I		ACC power sense input
63	BSENS	I		Back up power sense input
64	PDTI	I		PLL data input

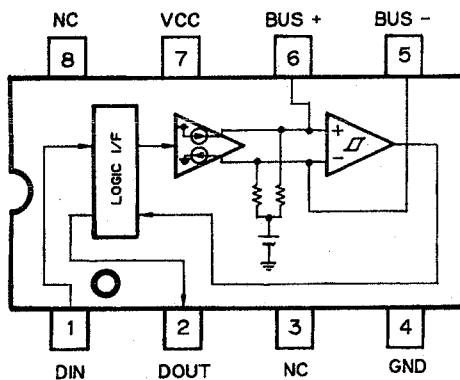

Pin No.	Pin Name	I/O	Output Format	Function and Operation
65	PDTO	O	C	PLL data output
66	PCK	O	C	PLL clock output
67	PCE	O	C	PLL chip enable output
68	VDD			Power supply
69,70	X1,X2			Main system clock oscillator connection
71	GND			GND
72	NC			Not used
73	TELIN	I		Telephone mute signal input
74	AVDD			Positive power supply terminal for analog circuit
75	AVREF	I		A/D converter reference voltage
76	SL	I		Signal level input from tuner
77	MODEL	I		Model select input
78	TMUTE	O	C	Tuner mute output
79	TXRST	O	C	Not used
80	MUTE	O	C	System mute output

Output Format	Meaning
C	CMOS
NM	N channel open drain

●Pin Functions (M51581FP)

Pin No.	Pin Name	I/O	Function and Operation
1	TX	O	Digital audio interface format output
2	RESET	I	Reset input
3	RX1	I	Digital audio data input 1
4	NFR	O	RX1 level converter output
5	RX2	I	Digital audio data input 2
6	RXSEL	I	RX select input
7,8	PD1,PD2	O	Phase comparative output for charge pump VCO
9	UNLOCK	O	Unlock detect output
10	RXCKI	I	VCO clock input
11	RXCKO	O	VCO clock output
12	SDI	I	Serial audio data input
13	BCK	I/O	Digital audio bit clock input/output
14	LRCK	I/O	Audio data word select input/output
15	SDO	O	Serial audio data output
16	ADSDI	I	A/D converter serial audio data input
17	VSS		GND
18	ADSEL	I	Serial data audio source select input
19	FLAGI	I	Error flag input
20	FLAGO	O	Error flag output
21	WCK	O	Word clock output
22	ASL	I	Audio data sampling length select input "H":24 bits "L":16 bits
23	IIS	I	Audio data format select input
24	MSBF	I	MSB select input
25	LRCKPOL	I	LRCK pole select input "H":Lch "L":Rch
26	MSTCK	I/O	Master clock input/output
27	CKSEL	I	Master clock frequency select input
28	REFCK	I	Reference clock input for sampling frequency accurate check
29	CKACO	O	Sampling frequency accurate check output
30	MUTE	I	Mute control input
31,32	MODE0-1	I	Mode select input
33	IN/OUT	I	Transmission reception select input
34,35	CAT0,1	I/O	Category information input/output
36	TXOE	I	TX output enable input
37	FSINSEL	I	fs information select input
38	VDD		Power supply
39	VSS		GND
40	TYPE	I/O	Type information input/output
41,42	FS0-FS1	I/O	fs information input/output
43	COPY	I/O	Copy information input/output
44	EMP	I/O	Emphasis information input/output

● System

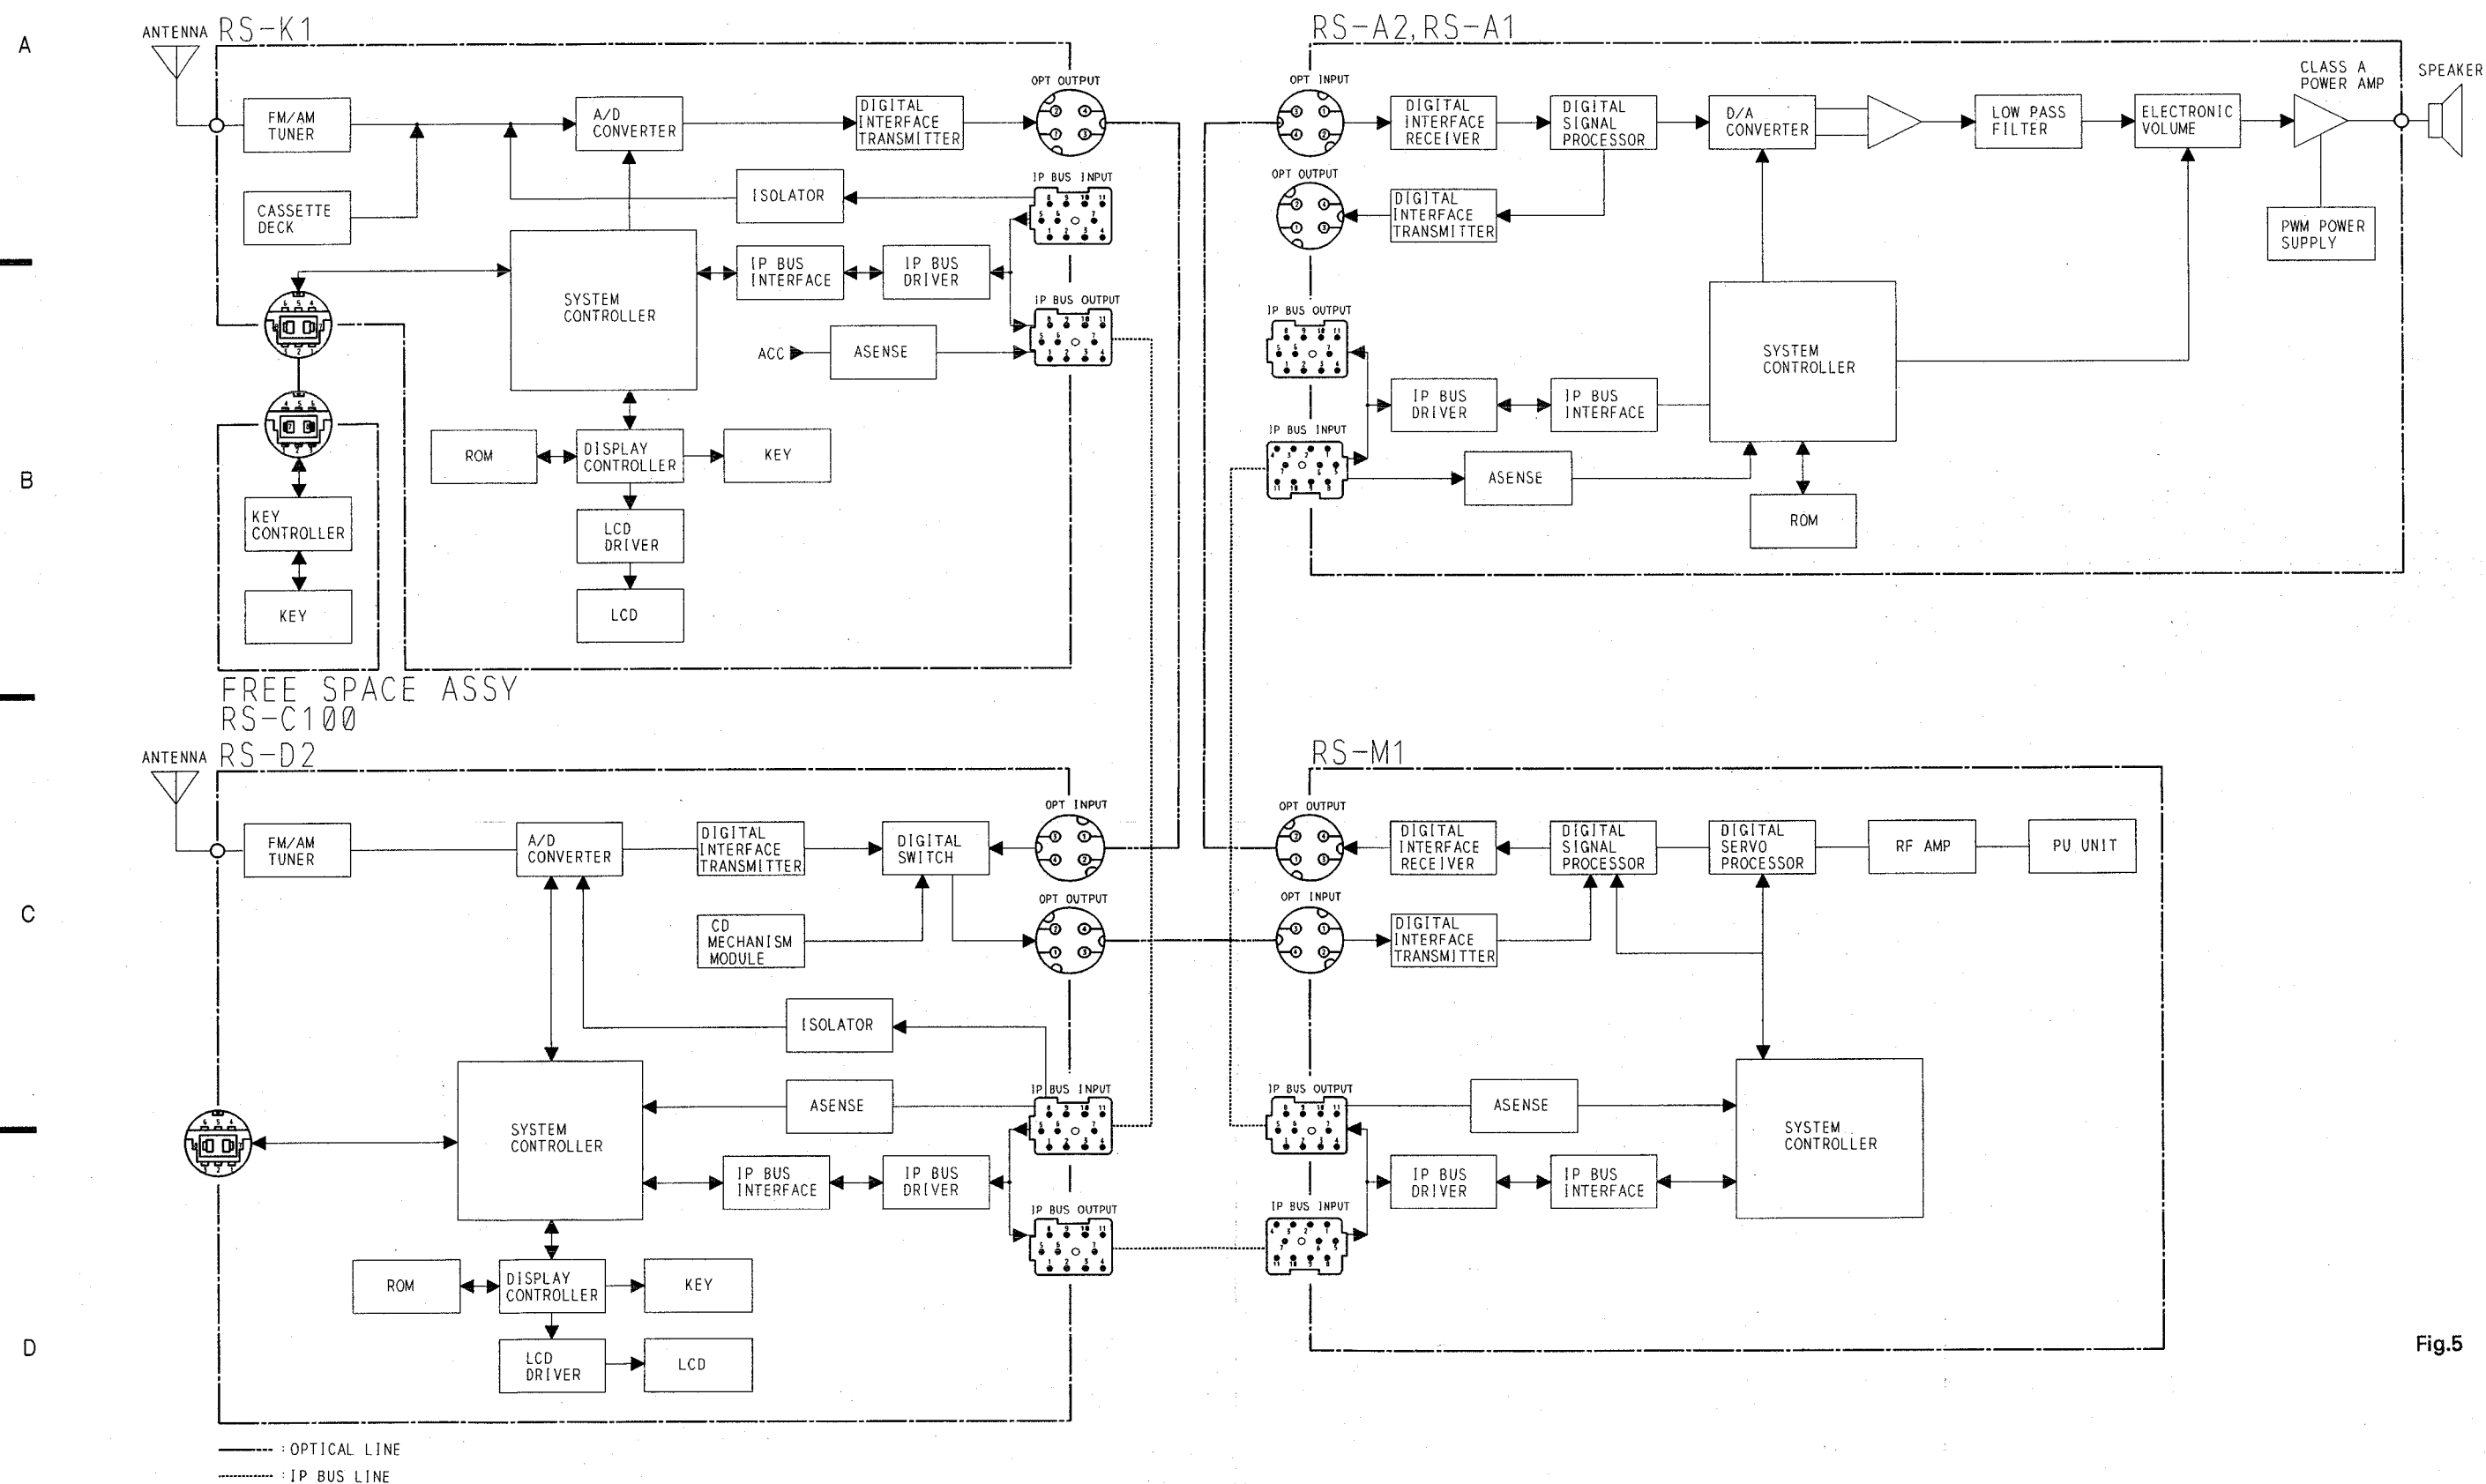

Fig.5

The diagram illustrates the electrical architecture of a VCR, organized into the following main sections:

- CONTROL UNIT (CD MECHANISM MODULE):** Contains the CD pickup, tracking/focus motor, spindle motor, load motor, and various control ICs like the Digital Servo Processor (IC 601) and D/A Converter (IC 701).
- FM/AM UNIT:** Handles radio reception with an antenna, FM/AM tuner ICs (IC 201, IC 502), and associated amplifiers and filters.
- POWER SUPPLY UNIT:** Manages power regulation, including a DC/DC converter (IC 100), various regulators (Q 963, Q 964), and a power switch (Q 959).
- MOTHER P.C. BOARD:** The central processing unit containing the Main CPU (IC 601), digital interface transmitter (IC 702), and various control logic ICs.
- OPT OUT P.C. BOARD:** Manages optical output and includes components like the optical input select (IC 704) and optical output (IC 705).
- CONTROL P.C. BOARD:** Controls the display and includes a display and key controller (IC 901) and a remote control receiver (IC 904).
- DRIVER P.C. BOARD:** Drives the display and includes a full dot matrix LCD and electro-luminescence LCD back light.

The schematic shows a complex network of signal and power lines connecting these modules, with numerous components labeled with their respective part numbers and functions.
